Career Objective

I would like to further improve my skills and creative thinking in Information Technology & to work with new technological developments in a more standardize working environment. Also believe that I could design a well competent web solution that matches any requirement since I have more than 10 years of experience.

I would like to work with industry's leading web portals like SharePoint, WordPress, Drupal and Joomla since I have hands on experience on portals for more than 7 years. Additionally I am capable of developing dynamic web sites on PHP platform and .Net platform.

The expert knowledge in professional design tools and innovative technologies provides me the flexibility and freedom to bring my vision to reality.
